

How a 600+ Strong Sales Team in Mumbai Switched from Manual Orders to Real-Time Sync **with Effortless**

The Growing Pain of Manual Order Tracking

This distribution-led business struggled with sales reps logging orders through WhatsApp and Excel spreadsheets. Finance teams were buried in manual entries with no real-time visibility—creating a reactive, chaotic environment.

Key Challenges

- ▲ No visibility into multi-city sales
- ▲ Finance buried in manual data entry
- ▲ Missed or duplicate orders
- ▲ Delays in collections and dispatch

The Effortless Fix

Effortless transformed operations with **mobile-first order automation, creating real-time synchronisation between sales and finance teams** through a central dashboard. This provided complete visibility across cities, enabled faster payment follow-ups, and eliminated manual data entry entirely.

↓ **100%**

Real-time receivables for multi-city sales teams

↑ **80%**

Faster invoice approvals across branches

↑ **96%**

Order fulfilment reduced from 24 hrs to 1 hr

↑ **70%**

Better visibility into stock and collections

"Before Effortless, tracking orders and approvals on the go was tough using email, WhatsApp, and Excel, with constant calls to the office. Now, real-time receivables on their phones speed up collections and keep cash flow steady. Effortless has united our sales and finance teams."
