

How This Surat Logistics Company Digitized Operations and Improved Efficiency **with Effortless**

Paper-Based Workflows Slowed IT and Finance Ops

This logistics provider managed reimbursements through scattered, paper-based submissions and manual approvals. The IT team struggled with no centralized system, poor visibility, and repeated errors. The lack of integration made it harder to scale operations smoothly.

Key Challenges

- ▲ Paper-heavy reimbursement submissions with no automation
- ▲ No centralized platform for tracking approvals
- ▲ Errors and delays from manual processes
- ▲ Difficulty linking claims to projects and teams
- ▲ IT overhead in maintaining fragmented systems

The Effortless Fix

Effortless gave IT one digital platform for **claims, approvals, and tracking**, replacing paper-heavy workflows. With **Multi-level Approvals and Expense Tracking**, the IT team reduced manual dependencies, improved data accuracy, and simplified adoption across finance and operations.

Integration Failures with Tally

"Earlier, reimbursements meant scattered systems and endless follow-ups. With Effortless, everything runs on one secure platform—faster, accurate, and easy for IT to manage."
