

How This Jaipur-based LED Manufacturer Gained Unified Finance Visibility with Effortless

Manual Finance Processes Causing Delays and Leaks

This manufacturer managed 100+ SKUs across two plants and exports to 30+ countries, but finance was buried in spreadsheets. With 20+ accountants chasing fragmented systems, reconciliations lagged, visibility was poor, and cash leaks left the CFO blind to compliance and working capital.

Key Challenges

- ▲ Finance team stuck in spreadsheets with slow reconciliations
- ▲ High dependency on manual entries across plants and exports
- ▲ Poor visibility into expenses, receivables, and cashflow
- ▲ Compliance risks with fragmented GST/TDS tracking

The Effortless Fix

Effortless streamlined finance with **Daily Bank Sync & Reconciliation** and **Smart Compliance Check (ITC, TDS)**. Using the **Business Health Dashboard, Petty Cash Management, and Expense Approval Flows**, the CFO gained real-time visibility into cashflow and expenses.

↓ **100%**

Unified Reporting across plants and export markets

↓ **60%**

Faster daily visibility into financial data

↓ **88%**

Reduction in finance delays and cash leaks

↑ **₹50L**

Tracked in bills and petty cash in one place

"Before Effortless, finance was stuck in spreadsheets and delays. Now, reporting is unified, cash leaks are down 88%, and I have real-time visibility. It's like X-ray vision for my finances."

 **Chief Finance Officer**
