

How This Bengaluru Distributor Fixed Bank Reconciliation & Invoicing Chaos with Effortless

Errors and Delays Undermining Cashflow Visibility

This distributor reconciled payments in Excel and raised invoices via emails and disconnected tools. Without real-time matching, mismatches and delays were constant, leaving the CFO with poor visibility to track receivables and plan cash flow.

Key Challenges

- ▲ Bank reconciliations dragging for days every month-end
- ▲ Frequent mismatches between bank entries and invoices
- ▲ No real-time visibility into receivables and cash balances
- ▲ Delayed collections disrupting working capital and financial control

The Effortless Fix

Effortless streamlined operations with **Banking & Cashflow Management, Automated Transaction Matching, and Digital Invoicing**. A unified **Business Health Dashboard** gave the CFO full visibility into receivables, reconciliations, and cashflow—removing errors and saving time.

↓ 95%

Fewer Reconciliation Mismatches

↓ 50%

Reduction in Time to Close Books

↑ 70%

Faster Month-End Reconciliations

↑ 30%

Faster Collections improving Working Capital

"Before Effortless, reconciling accounts was painfully slow and filled with errors. Today, everything—bank sync, invoices, collections—runs in real time. I finally have the visibility and control I need."
